| <ul style="list-style-type: none"> • The shaded area of the image above represents the printable area. Do not deviate from the printable area. • Minimum font point size: 6 pt. San Serif Font (ex. Helvetica) • Minimum line width: 0.5 pt. • Minimum line width knockout/reversed: 1.0 pt. • Collect for output, all graphic elements (links) and fonts (printer and screen). Include sub-ordinate fonts used in linked graphic elements. • Vantiva will trap your electronic files. If submitting film, apply a 0.35 pt. trap to all colors where registration is critical. • Indicate all colors required. This includes white floods or custom white. | <ul style="list-style-type: none"> • If CUSTOM WHITE is required, please send the separation visible and specify 'Custom'. • Specify all knockout elements and their final appearance. This will ensure Vantiva meets your desired finished product. • Color-accurate proofs are required to ensure color and content accuracy. • Image resolution (raster images) of 300 dpi or higher is required to ensure image quality. Re-link to your hi-resolution images when using FPOs. • Vantiva respects all color profiles embedded in your design. • Bleeds are encouraged when designing in Adobe Illustrator. Final masking and film/file output will take place within Adobe InDesign. Note: Do not create bleeds if designing fully using Adobe InDesign. |
