With no fewer than 19 antennas smartly distributed for 360° coverage and the power of Qualcomm® Snapdragon™ X65, Cobra 5G offers the best of the best FWA 5G indoor experience.

### A sneak peek into Cobra 5G specifications

Wi-Fi AX 6000  
Wi-Fi EasyMesh™ R4

Dual-band, high-power  
2.4GHz (4x4), 5GHz (4x4)

Bluetooth Low Energy  
connectivity 5\*

Dual-core CPU

4x 1GB LAN Ethernet  
2.5 GB LAN/WAN Ethernet

USB 2.0 port

## Cobra 5G features that matter

### HIGH-SPEED INTERNET ACCESS

Powered by Qualcomm Snapdragon, the Cobra 5G brings the latest in 5G technology to your clients, offering up to **200MHz bandwidth for blazing-fast internet speeds.**

### WANSENSING™ BACKUP

A 2.5 GB WAN Ethernet port turns Cobra 5G into a **powerful wired router with a 5G backup connection**, seamlessly switching between connections, enabling consistent service to customers for whom broadband is paramount.

### HOMEWARE™ FIRMWARE

Cobra 5G offers a **secure, user-friendly platform that supports innovative services and applications**, with comprehensive security and exhaustive remote management features.

### EXTENSIVE LAN CONNECTIVITY

Leveraging **dual-band Wi-Fi 6 and 8 independent, high-powered antennas**, Cobra 5G provides 500Mbps+ speeds across all corners of the space\* to support a plethora of business needs.

\*when paired with an extender.

### ADVANCED 5G COVERAGE

An **8-antenna set and our innovative Indoor5G™ / RuralBoost™ technologies**, enable Cobra 5G to extend the FWA service area by up to 40% — ensuring **reliable, high-quality 5G reception** for more clients & a robust network.

**Unlock the potential of 5G to deliver next-generation broadband to more subscribers and maximize business opportunities today.**

# All the ways Cobra 5G is there for you

Planning, management, coverage, and control

## SELF-SERVICE, INSTANT CONNECTIVITY

Time is of the essence — particularly for users that rely on broadband for business every day. Cobra 5G offers SOHOs and SMBs **instant connectivity**, without a technician visit, ahead of fiber installation or in previously hard-to-reach locations — plus backup for fiber outages.

## WI-FI EVERYWHERE YOU NEED IT

No location is alike — that's why flexible, full coverage Wi-Fi is essential. With EasyMesh, SOHOs and SMBs can experience **seamless, corner-to-corner connectivity**, supporting more devices than ever while limiting dead zones, drop offs, and roadblocks.

## SELF-INSTALLATION & CONTROL

The NaviGate 5G™ and NaviGate Companion™ mobile apps offer **guided installation with AR-assisted device positioning** for the best 5G reception, Wi-Fi/Bluetooth® device pairing, monitoring and management of connected devices and the Wi-Fi network, plus **customizable internet access rules, security settings, and speed & performance testing**.

## SIMPLE SETUP, EASY ACCESS

Integrated service management platforms allow service providers to manage and maximize the subscriber experience — that means **quicker setup, onboarding, and access to value-added services and features**. Plus, automated remote firmware upgrades, so you can focus on the things that matter to you, not your gateway.

## PEACE OF MIND WITH 5G BACKUP

In business, continuity of service is crucial. With a configurable WAN Ethernet port and our exclusive **WanSensing™ technology**, ensure uninterrupted connectivity with **seamless network switching** — from fiber to 5G in the event of failure or interference.

## Benefits for SOHOs & SMBs

### EFFICIENCY & PRODUCTIVITY

- Consistent connected operations
- Fast upload/download speeds
- Improved customer experiences

### CONTINUOUS CONNECTIVITY

- Reliable, fast, fiber-like speeds
- Backup connection/failure protection
- Minimized downtime/interruption
- Support for critical operations

### SCALABILITY & RELIABILITY

- Reliable, high-quality 5G reception
- Robust network performance
- Streamlined growth and expansion

### SECURITY & MANAGEMENT

- Ensured data protection
- Streamlined security management
- Peace of mind for users & clients
- Network management from anywhere

### OPERATIONS & COMMUNICATION

- Support for all your devices at once
- Ready for data-intensive applications
- Seamless online collaborations
- Improved internal & external communications
- Enhanced customer service
